Digital PinBrazing unit

Det nya, lätta och digitala pinnlödningsaggregatet ECONECT uppnår en helt ny prestationsnivå. Trots ökad lödkapacitet än tidigare aggregat så har vikten reducerats med 60%. Vilket inte bara gör det perfekt för underhållsarbete utan det kan även ersätta betydligt större aggregat. ECONECT drivs av ett nytt revolutionerande nano-batteri med längre livslängd än tidigare batterier.

Vikten är endast 9,8kg.

Lodpinnar utan tidtråd skall användas

The new lightweight and digitized pin brazing unit ECONECT reaches a whole new level of performance.

Despite higher brazing capacity than previous units has the weight been reduced with 60%. Which not only makes it ideal for maintenance work, but it can even replace much larger units. ECONECT is powered by a revolutionary new nano-battery with longer life than previous batteries.

The weight is only 9,8kg (21,6Lb)

Used with brazing pins without fuse wires.
